Heidi Weber

Gifted Intervention Specialist, NBCT, Google Level I Certified Educator, PBS Digital Innovator '15, Symbaloo Certified

Participants will learn how digital literacy can and should be integrated into their classrooms. Students learn skills when using digital tools and are motivated and engaged more. Participants will learn how digital literacy can be integrated, implemented, and promoted. Participants will take samples of resources and tools with them to implement and try in their own classrooms. These resources include "how to"videos for creating content or linking content for their own students.

Put it on a screen...and readers are hooked! Anything becomes more interesting when you find a way to make it digitally enhanced. There are many simple ways educators can recapture student interest and introduce digital literacy with technology integration. Technology will never replace teachers, but it can make us more effective and efficient! Discover how to use technology to breathe new life into your classroom, clone yourself to maximize time with students,create a virtual newsstand for informational text, and engage students with digital collaboration and conversation. Tips,tricks, and techniques include:

- How to develop and enhance a classroom digital newsstand resource
- Tools for linking content for easy student access
- Digital tools for vocabulary and responding to text
- Ways to "Love Language with Lyrics"
- Tips and resources for reading digital images
- How to create a community of correspondents and collaborators
- Simple ways to "flip" content for student centered learning
- Harnessing interactive video tools
- How to promote and integrate media literacy
- Ideas for custom content
- Tools for reciprocal teaching
